hls4ml

AI Hardware Development Training

Arizona State University
April 30-May 1, 2025

Developed and taught by scientists leading research efforts in AL/ML ∩ Science!

ABOUT THE WORKSHOP

This FREE workshop provides an introduction to *hls4ml*, an automated tool to convert ML models to high level descriptions used in the High Level Synthesis to develop hardware implementations of fast edge-ML applications.

Participants will learn about *hls4ml* and application domains in science and engineering and implement mission-specific code to run on hardware platforms.

This workshop will contain a mix of technical presentations and hands-on training sessions on *hls4ml* led by academic and National Lab leaders as well as networking activities with these experts and other participants at the school.

IT'S FREE!
SPACE IS LIMITED
